A world of "smart" devices means the Internet can kill people. We need to act. Now. Everything is a computer. Ovens are computers that make things hot, refrigerators are computers that keep things cold. These computers—from home thermostats to chemical plants—are all online. The Internet, once a virtual abstraction, can now sense and touch the physical world. As we open our lives to this future, often called the Internet of Things, we are beginning to see its enormous potential in ideas like driverless cars, smart cities, and personal agents equipped with their own behavioral algorithms. But every knife cuts two ways. All computers can be hacked. And Internet-connected computers are the most vulnerable. Forget data theft; cutting-edge digital attackers can now crash your car, your pacemaker, and the nation's power grid. In Click Here to Kill Everybody, renowned expert and best-selling author Bruce Schneier examines the hidden risks of this new reality. After exploring the full implications of a world populated by hyperconnected devices, Schneier reveals the hidden web of technical, political, and market forces that underpin the pervasive insecurities of today. He then offers common-sense choices for companies, governments, and individuals that can allow us to enjoy the benefits of this omnipotent age without falling prey to its vulnerabilities. From principles for a more resilient Internet of Things, to a recipe for sane government regulation and oversight, to a better way to understand a truly new environment, Schneier's vision is required reading for anyone invested in human flourishing.

Exercises with Phrasal Verbs #2 is for anyone learning English as a foreign or second language (EFL/ESL). It is aimed at students of intermediate and advanced levels. The book provides extensive practice of over 350 of the most useful phrasal verbs in English. Let's be honest, phrasal verbs are never going to be the most fun part of learning English. However, with this 'clic-book' you can work with a lot of material at your own speed and without pressure, focusing on this key aspect of the English language. The book is divided into three sections. PART ONE focuses on phrasal verbs that use the most frequent lexical verbs (get, go, make, put, etc.), providing lots of opportunities to practice these verbs. PART TWO is based on the prepositions used in phrasal verbs (about, from, in, on, up, etc.) and once again provides a great many opportunities to practice the most common verbs. In parts ONE and TWO you will study over 350 different phrasal verbs, each used in different exercises. Finally, PART THREE contains five longer texts containing many of the phrasal verbs found in the previous parts of the book, plus some new ones. These longer texts are very useful for practising reading comprehension at an intermediate-advanced level. This book is for EFL / ESOL students at levels B and C of the Common European Framework of Reference for Languages, for TOEFL and TOEIC, and for those studying towards Cambridge First Certificate and Cambridge Advanced exams. \* ~ \* Clic-books: What?
