A Historic Science Fiction Novel filled with technology and religious (fact & fiction) in-betweens. Jesus and Elijah would become the sole reason why the New Testament would come to fulfillment. Elijah, from the Old Testament is from an advanced race of aliens, who have been watching over mankind. Elijah taps into a sort of godlike spherical energy, which allows his computer to generate a plan based on specific data given by the Creative Energy (God). These instructions will create what will become known as the Articles of Faith (the Trinity). The Articles of Faith is a comprised directive for creating a single person (Jesus) who would be responsible for bringing all the religions of the world into continuity with one another, before Judgement Day, April 5th, 2037.

Most importantly, it's packed with big-picture advice that will set you up to land the job that's perfect for who you are—and who you want to be.

Mentorship is a catalyst capable of unleashing one's potential for discovery, curiosity, and participation in STEMM and subsequently improving the training environment in which that STEMM potential is fostered. Mentoring relationships provide developmental spaces in which students' STEMM skills are honed and pathways into STEMM fields can be discovered. Because mentorship can be so influential in shaping the future STEMM workforce, its occurrence should not be left to chance or idiosyncratic implementation. There is a gap between what we know about effective mentoring and how it is practiced in higher education. *The Science of Effective Mentorship in STEMM* studies mentoring programs and practices at the undergraduate and graduate levels. It explores the importance of mentorship, the science of mentoring relationships, mentorship of underrepresented students in STEMM, mentorship structures and behaviors, and institutional cultures that support mentorship. This report and its complementary interactive guide present insights on effective programs and practices that can be adopted and adapted by institutions, departments, and individual faculty members.

Lone Star Politics delves into the state's rich political tradition by exploring how myth often clashes with the reality of everyday governance. Explaining who gets what and how within the state, this Nacogdoches author team provides an engaging narrative on the evolution of Texas politics, utilizing the comparative method to set Texas in context with other states' constitutions, policymaking, electoral practices, and institutions. Responding to user demand, the authors have split or added chapters to provide more in-depth coverage of much-desired topics, including the legislature and legislative process, the governor and bureaucracy, parties and organized interests, as well as fiscal, criminal justice, and social policy. In addition, new chapter objectives and critical thinking questions reinforce learning and encourage analysis. Students will come away with a strong understanding of Texas government and the needed foundation to assess the state's political landscape. Beyond more

depth and breadth, the new third edition now features a full-color design. The book's photos, tables, charts, and maps leap off the page in vivid detail and help students focus on key takeaways. Lone Star Politics delivers well-crafted and colorful content without breaking the bank.

Youth mentoring programs must change in order to become truly effective. The world's leading expert shows how. Youth mentoring is among the most popular forms of volunteering in the world. But does it work? Does mentoring actually help young people succeed? In *Older and Wiser*, mentoring expert Jean Rhodes draws on more than thirty years of empirical research to survey the state of the field. Her conclusion is sobering: there is little evidence that most programs—even renowned, trusted, and long-established ones—are effective. But there is also much reason for hope. Mentoring programs, Rhodes writes, do not focus on what young people need. Organizations typically prioritize building emotional bonds between mentors and mentees. But research makes clear that effective programs emphasize the development of specific social, emotional, and intellectual skills. Most mentoring programs are poorly suited to this effort because they rely overwhelmingly on volunteers, who rarely have the training necessary to teach these skills to young people. Moreover, the one-size-fits-all models of major mentoring organizations struggle to deal with the diverse backgrounds of mentees, the psychological effects of poverty on children, and increasingly hard limits to upward mobility in an unequal world. Rhodes doesn't think we should give up on mentoring—far from it. She shows that evidence-based approaches can in fact create meaningful change in young people's lives. She also recommends encouraging “organic” mentorship opportunities—in schools, youth sports leagues, and community organizations.

This thoroughly updated Second Edition of the Handbook of Youth Mentoring presents the only comprehensive synthesis of current theory, research, and practice in the field of youth mentoring. Editors David L. DuBois and Michael J. Karcher gather leading experts in the field to offer critical and informative analyses of the full spectrum of topics that are essential to advancing our understanding of the principles for effective mentoring of young people. This volume includes twenty new chapter topics and eighteen completely revised chapters based on the latest research on these topics. Each chapter has been reviewed by leading practitioners, making this handbook the strongest bridge between research and practice available in the field of youth mentoring.
