Shahnama Studies
III offers new
insights into the
reception of the
Shahnama or Book
of Kings, composed
by the Persian poet
Firdausi in the
10th-11th century
in eastern Iran.

This monograph presents a morpho-syntactic investigation on modality, aspect, and negation by concentrating on Persian, and is designed to contribute to theoretical linguistics and the study of Iranian

languages. The analysis is based on the Minimalist program. This research challenges the idea that the syntactic structure maps on the semantic interpretation or vice versa. The discussion presented in this monograph shows

Download Free Dastan Ba Zan

that the syntactic structure of Persian modals is uniform no matter if the modals are interpreted as having root or epistemic readings. Although it is claimed that modals are raising constructions in different languages, modals

Download Free Dastan Ba Zan

in Persian, which does not have subject-raising constructions, show a different syntactic behavior. Furthermore, the structural analysis of the interaction of Persian modals and negation shows that because of the scope interaction

of negation and modals, the syntactic structure of modals with respect to negation mostly corresponds to the semantic interpretation of modals.

The work of Nizami Ganjavi, a classical poet of the twelfth century, is fueling new cultural debate in Iran in recent years. The

dominant discourse encourages the reading of the texts in light of biographical or theological conventions and religious motives. These essays explore Nizami's influential role and his portrayal of issues related to love, women, and

science, stressing his preoccupation with the art of speech as a major impetus behind his literary activity.
