The New Geographies of Energy: Assessment and Analysis of Critical Landscapes is a pioneering collection of new geographic scholarship. It examines such vitally important research topics as energy dilemmas of the United States, large trends and patterns of energy consumption including China's role, "peak oil", energy poverty, and ethanol and other renewable energy sourcing. The book offers advances in key emerging areas of energy research, each distinguished in the following sections: (i) geographic approaches to energy modeling and assessment; (ii) fossil fuel landscapes; (iii) the landscapes of renewable energy; (iv) landscapes of energy consumption; and (v) an overview of the new geographies of energy (Karl Zimmerer, Annals Nature-Society and Energy issue editor) and an essay on America's oil dependency (Vaclav Smil, renowned energy geographer). In addition there is a specially commissioned book review. This book was published as a special issue of the Annals of the Association of American Geographers.

Held October 13-16, 1992. Emphasizes information systems security criteria (& how it affects us), and the actions associated with organizational accreditation. These areas are highlighted by emphasizing how organizations are integrating information security solutions. Includes presentations from government, industry and academia and how they are cooperating to extend the state-of-the-art technology to information systems security. 72 referred papers, trusted systems tutorial and 23 executive summaries. Very valuable! Must buy!

The Handbook of Human Factors in Web Design covers basic human factors issues relating to screen design, input devices, and information organization and processing, as well as addresses newer features which will become prominent in the next generation of Web technologies. These include multimodal interfaces, wireless capabilities, and agents that can improve convenience and usability. Written by leading researchers and/or practitioners in the field, this volume reflects the varied backgrounds and interests of individuals involved in all aspects of human factors and Web design and includes chapters on a full range of topics. Divided into 12 sections, this book covers: historical backgrounds and overviews of Human Factors and Ergonomics (HFE) specific subfields of HFE issues involved in content preparation for the Web information search and interactive information agents designing for universal access and specific user populations the importance of incorporating usability evaluations in the design process task analysis, meaning analysis, and performance modeling specific Web applications in academic and industrial settings Web psychology and information security emerging technological developments and applications for the Web the costs and benefits of incorporating human factors for the Web and the state of current guidelines The Handbook of Human Factors in Web Design is intended for researchers and practitioners concerned with all aspects of Web design. It could also be used as a text for advanced courses in computer science, industrial engineering, and psychology.

Argues that public finance--the study of the government's role in economics--should incorporate principles from behavior economics and other branches of psychology.
