If you can read musical notes, you can sing any song or play any piece. But musical notes have not always been here. Long ago, songs were memorized. If songs were forgotten, they were lost forever. Thanks to one man, Guido d ' Arezzo, music now can last forever.

Written by a leading authority and artist of the historical transverse flute, *The Notation Is Not the Music* offers invaluable insight into the issues of historically informed performance and the parameters—and limitations—of notation-dependent performance. Tradition addresses the many unwritten nuances of dynamics, articulation and agogics as an expression of fundamental principles of a common European musical language. It treats the score as an incomplete musical shorthand that outlines the compositional and interpretive imperatives implicit within it, drawing on historical records from the eighteenth and nineteenth centuries and detailed comparisons of works to underline the author ' s presentation of Viennese tradition. This book is not primarily concerned with questions of style or interpretation. Rather, it explains the many facets of musical notation that were taken for granted by composers who assumed a knowledge of the piano tradition of their day. Notes Become Music informs not only those students in countries where the central European music tradition is still unfamiliar, but also a younger generation of Europeans who have grown up without a living connection to their musical past.
