IBM Watson Micromedex Advanced Consumer Information provides comprehensive consumer information pertaining to a wide variety of drugs, such as a list of commonly used brand names, drug descriptions, warnings and precautions, and detailed information on the proper use of each drug.

A - Z Drug List from Drugs.com - Drugs.com | Prescription ...

Analgesics or painkillers are drugs that help relieve pain and usually fall into one of several categories; opioids, nonopioids, non-steroidal anti-inflammatory (NSAID) and 'other'. Paracetamol. Ibuprofen. Co-codamol (paracetamol and codeine mix) Codeine. Tramadol. Morphine. Diclofenac. Aspirin. Naproxen. Dihydrocodeine. Oxycodone. Nefopam. Gabapentin.

An easy-to-use reference for thousands of medications, Saunders Nursing Drug Handbook 2013 promotes safe patient care by guiding you through clinical priorities and providing comprehensive coverage of IV drug administration. It also helps you prevent medication errors with Black Box Alerts, information on drug dosages for combination drugs, and key nursing considerations. Side effects are separated by their frequency. Written by oncology nurse Barbara Hodgson and hospital pharmacist Robert Kizior, this handbook is organized alphabetically by generic drug name for quick access to essential information. It's ideal for the busy nurse! UNIQUE! Combined nursing and pharmacology authorship ensures clinical accuracy of nearly 900 generic name drugs - encompassing over 4,000 trade name drugs. Detailed information on each drug includes side effects and adverse reactions broken down by frequent, occasional, and rare, with percentages of occurrence. Safe drug administration is promoted by clearly marked high-alert drugs, Tall Man spellings, and an appendix with sound-alike and look-alike drugs. UNIQUE! Monographs of frequently used herbs are included, plus additional herb information in the appendix, with potential herbal interactions indicated within drug entries for quick reference. Information on combined drugs and fixed combinations covers drug dosage options for specific diseases. Lifespan and disorder-related dosage variations focus on the needs of specific populations, such as pediatric, geriatric, hepatic, and immune- or renal-compromised patients. Nursing implications organized in the functional nursing process framework include content on baseline assessment, intervention/evaluation, and patient and family teaching. Comprehensive foldout IV compatibility chart provides compatibility information for 65 intravenous drugs. List of newly approved drugs in the front of the book makes it easy to locate the latest drugs. An Evolve companion website includes customizable and printable monographs for 200 of the most commonly prescribed drugs, techniques of medication administration, and more. New drug monographs are included for 27 new FDA-approved drugs. Updated monographs include new interactions, precautions, alerts, patient teaching instructions, and other need-to-know information. Updated Black Box Alerts highlight drugs with a significant risk of serious or life-threatening adverse effects. Expanded IV content includes IV compatibilities, rates of infusion, reconstitutions, drip rates, test doses, flushing, and incompatibilities.

Over 1,000 generic name drugs, encompassing over 4,000 trade name drugs, are organized alphabetically with A-to-Z tabs for quick and easy access. Detailed information for each drug distinguishes side effects and adverse reactions to help you identify which are most likely to occur. Highlighting of high-alert drugs helps promote safe administration of drugs that pose the greatest risk for patient harm; an appendix includes drug names that sound alike or look alike. UNIQUE! Herbal information is included in the appendix and on the Evolve companion website, covering the interactions and effects of commonly encountered herbs. Classifications section features an overview of actions and uses for drug families. Top 100 Drugs list helps you easily identify the most frequently administered drugs. Nursing considerations are organized in a functional nursing process framework and include headings for baseline assessment, intervention/evaluation, and patient/family teaching. Information on lifespan and disorder-related dosage variations equips you with special considerations for pediatric, geriatric, hepatic, and immune- or renal-compromised patients. Extensive IV content features IV compatibilities/IV incompatibilities and breaks down key information with headings on reconstitution, rate of administration, and storage. Fixed combinations are included in dosages of each combined drug directly within the individual monographs, to help you understand different drug dose options for specific diseases. Cross-references to the 400 top U.S. brand-name drugs are located throughout the book for easy access. Customizable and printable monographs for 100 of the most commonly used drugs are located on Evolve, along with quarterly drug updates. Therapeutic and toxic blood level information promotes safe drug administration. Comprehensive IV Compatibility Chart foldout arms you with compatibility information for 65 intravenous drugs. List of newly approved drugs in the front of the book makes it easy to locate the latest drugs. Callouts in a sample drug monograph highlight key features to help you understand how to use the book more efficiently.

THE #1 Drug Guide for nurses & other clinicians...always dependable, always up to date! The thoroughly updated Nursing2021 Drug Handbook includes: Nursing-focused drug monographs featuring for over 3,700 generic, brand-name, and combination drugs in an easy A-to-Z format 63 brand-new FDA-approved drugs More than 8,200 clinical updates —new dosages and indications, Black Box warnings, adverse reactions, nursing considerations, clinical alerts, and patient teaching information Special focus on U.S. and Canadian drug safety issues and concerns Photoguide insert with images of 450 commonly prescribed tablets and capsules
