- When the air conditioner has been installed or relocated, follow the instructions in the Installation Manual and purge the air completely so that no gases other than the refrigerant will be mixed in the refrigerating cycle. Failure to purge the air completely may cause the air conditioner to malfunction.

This book is written for the benefit of those who are interested in doing things themselves and those who are technically inclined. It's a foundation for those that are aspiring to be

HVAC/R&A Technician in the future. This is a Do It Yourself book that tells you the steps on how you can service your air-conditioner yourself as a layman and how you can carry out those minor repairs on your split room air-conditioner without the assistance of a service technician. This Do-It-Yourself book will save you a lot of money, it will save you a lot of down time and it will give your equipment a longer productivity and reliable life.

After over forty years of the refrigeration and air-conditioning industry, many changes have occurred. In order for one to keep up-to-date, most technical documents have not been seriously updated for current accuracy. This volume attempts to modernize some of the values that have undergone change over the years.

The Third Edition of ANSI/ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J (ANSI/ACCA, Eighth Edition) heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance (pressure drop) to blower performance (as defined by manufacturer's blower performance tables). This assures that appropriate airflow is delivered to all rooms and spaces; and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single-zone systems, and multi-zone (air zoned) systems. The primary equipment can have a multi-speed blower (PSC motor), or a variable-speed blower (ECM or constant torque motor, or a true variable speed motor). Edition Three, Version 2.50 of Manual D (D3) specifically identifies normative requirements, and specifically identifies related informative material.

GRIHA the national rating system of India is an evaluation tool for measuring and rating a building's environmental performance. This set of 5 GRIHA manuals have been developed as a guide for building professionals (architects, services engineers, landscape designers, project managers, contractors, etc.) who are involved in the design and construction of green buildings, to provide them a comprehensive understanding of the GRIHA rating system. The information provided in these manuals will serve as a complete guide for individuals who are interested in knowing about this rating system, its underlying criteria, rating process, strategies that should be adopted for complying with all the criteria and the documentation preparation and evaluation procedure.
