great religions: Buddhism, Christianity and Islam. Here are the great empires, from the vanished civilization of the Minoans on Crete to the glories of Classical Greece and Rome to the mysterious collapse of the Maya culture in Mexico. Here are the visionary scientists who altered our view of nature's laws: Newton and Darwin, Copernicus and Einstein. Here are the great conquerors, including Alexander the Great, Julius Caesar, Genghis Khan and Napoleon. And here are the great clashes between cultures, as Christian knights besiege Muslim citadels in the Crusades, a handful of Spanish conquistadors topple the empires of the Aztecs and Incas, and Japan attacks the U.S. naval base at Pearl Harbor. The book is arranged chronologically, rapidly accelerating in pace as it reports the development of the technologies that define the modern world, from the coming of the railroad and the telegraph to the advent of photography, the cinema and television and culminating in the invention of the transistor and the boot-up of the World Wide Web. And it offers fresh perspectives on cultures too often overlooked, from the Golden Age of Islam to the voyages of Viking mariners to China's renaissance under the Ming dynasty. Presented in a special oversized format, this beautifully illustrated volume also offers a sweeping panorama of man's greatest artistic achievements, from the cave paintings of Lascaux to marvelous medieval maps and on to the great paintings and sculptures of the Renaissance. As an illuminating guide to mankind's triumphs and sorrows, and as a gallery of human culture, science, art and architecture, it offers a dazzling and provocative encounter with the great turning points of history.

Here is a book that will surely spark a lively debate. Who are the hundred most influential religious and political leaders, artists, scientists, and adventurers of all time? How is it even possible to construct such a list? Now, the editors of LIFE comb history, compare notes and dive in. Find out who makes the cut: King Tut or Cleopatra? Thomas Jefferson or George Washington; The Rolling Stones or The Beatles; Steve Jobs or Bill Gates. This is a look at history told through its most charismatic and fascinating characters. It is also full of fun facts, tidbits, arguments and rarely seen pictures, and will appeal to curious minds, young and old alike.

"This book is a slice of intensified history—history as I saw it." So begins John Reed's first-hand account of the Bolshevik Revolution of 1917. Much anticipated when it was published in 1919, Reed's narrative remains as riveting today as when the events he describes were still reverberating throughout the world. Reed was hardly a disinterested observer, and his involvement in the Communist labor movement lends urgency and passion to his classic account. He vividly describes events in Petrograd in November 1917, when Vladimir Lenin and the Bolsheviks stormed the Winter Palace and seized the reins of power. Despite Reed's personal leanings, which he made no attempt to hide, the book garnered praise from luminaries across the political spectrum. George F. Kennan, the American diplomat, and father of the policy of Soviet containment, said that "Reed's account of the events

of that time rises above every other contemporary record for its literary power, its penetration, its command of detail. It will be remembered when all others are forgotten." Reed was committed to telling the story of the Russian revolution as truthfully as possible. That the book was banned by Russian premier Josef Stalin is a testament to the author's success in carrying out his mission. One hundred years after Russia and the world trembled, *Ten Days that Shook the World* brings alive the momentous events of 1917.

Honoring seven decades of outstanding work, a superlative assemblage of photographic images offers unforgettable moments from the past seventy years, capturing each era's greatest celebrities, horrific battlefield sequences, and everyday American life.

Depicts the last 125 years of history through the unforgettable images that appeared in *National Geographic*, from the organization's beginning as a scientific club to its growth into other disciplines including space exploration, climatology and archaeology.

This collection of photographs captures the moments that changed our modern world. The pictures are sometimes beautiful, often striking - and undeniably powerful.

Surveys the evolution of daily life in America in the last century, collecting 650 images from the archives of *LIFE* magazine that visually record significant changes along such themes as parenting, machines, entertainment, fashion, homes, jobs, and shopping.

More than five hundred images, selected from the photographic archives of "Life" and other collections, portray the people and events that transformed the modern era

Since its inception, *TIME* magazine has been synonymous not just with outstanding journalism, but also with outstanding photography. Now, to mark the 175th anniversary of photography and the birth of photojournalism, the Editors of *TIME* magazine are publishing this companion book to the groundbreaking digital celebration of photography that *TIME.com* will be mounting online, displaying the most influential photographs of all time. While they may not be the most famous or well-known photographs, each one is unique for the way in which it changed, influenced, or commemorated a particular world event. From the first sports photograph to ever win the Pulitzer Prize - that of Babe Ruth at Yankee Stadium to the photograph of Student Neda Agha-Soltan's death during Iran's 2009 election protests, each of the photographs in *100 Photographs: The Most Influential Images of All Time* is significant in how it forever changed how we live, learn, communicate, and in many cases, view the world.
