NEC3 Engineering and Construction Contract

Provides construction industry professionals with a practical and detailed guide to the NEC4 contract The NEC contract takes a collaborative, project management based approach to construction projects, which is very different to the other standard forms of construction contract. This new edition of the book covers all changes in the 4th Edition of the Engineering and Construction Contract, issued in June 2017, and will provide practical guidance to help users transitioning from NEC3 to NEC4. Inside A Practical Guide to the NEC4 Engineering and Construction Contract, readers will find chapters on the background of the NECECC; contract data and other documents; the 'spirit of mutual trust'; all of the individuals involved in the process (eg: project managers, clients, supervisors, subcontractors, etc.); communication issues, early warnings and other matters; quality management; titles; dealing with timing; payment processes; cost components; compensation procedures and assessments; dealing with terminations; dispute resolution; completing the contract and more. A practical guide to the application of the procedures contained in the newly issued NEC4 Engineering and Construction Contract Provides detailed guidance on the use of the agreement, which is claimed to offer increased flexibility, improved clarity and greater ease of use Written specifically for people actually using and administering the NEC contracts Features 3 appendixes covering tables of clause numbers, case law and statutes; employer's, project manager's, supervisor's, contractor's and adjudicator's actions; and communication forms and their uses. First launched in 1993, the NEC has become one of the UK's leading standard forms of contract for major construction and civil engineering projects, making A Practical Guide to the NEC4 Engineering and Construction Contract a must-have resource for any contractor using the latest version of this contract.

This book provides a detailed commentary on the latest edition of the New Engineering Contract NEC3. It explains how the contract is intended to operate and examines each clause to consider its application and legal interpretation. It draws upon the author's successful book on the second edition of the Engineering and Construction Contract, ECC2, and it identifies and comments on the changes between ECC2 and NEC3. Particular attention is given to the revised compensation event procedures, as well as: * the role of the project manager * the liabilities and obligations of the parties * the revised dispute resolution procedures

The NEC3 Engineering and Construction Contract (ECC) has been developed to meet current and future contracting needs for engaging contractors to provide project focused outcomes. The ECC is drafted on a relational contracting basis that embodies efficient management processes and can be used in a multi-party partnering arrangement by incorporating Option X12.

Launched in 1993, the NEC Engineering and Construction Contract has become one of the UK's leading standard forms of contract for major construction and civil engineering projects. The third edition, popularly known as NEC3, is a process based contract embodying project and commercial management best practice, so its basic philosophy differs from the more adversarial approach of other standard construction contracts. Since the first edition of this book, the third edition of the contract has seen the introduction of a new secondary option for use in the UK and amendments to a number of clauses. In addition, in September 2011, changes were introduced to cater for the amendments to the Housing Grants, Construction and Regeneration Act 1996 contained in the Local Democracy, Economic Development and Construction Act 2009, which became effective for all new contracts entered into from 1 October 2011. These amendments have been incorporated into the text. A Practical Guide to the NEC3 Engineering and Construction Contract will be useful to everyone in the construction industry working on a project under this contract. It will be of interest to the complete construction supply chain, including employers, construction professions, contractors and sub-contractors, as well as consultants and lawyers advising any of these parties, either in the preparation of contract documentation or the day to day management or the resolution of problem situations which may arise.
