This package includes a physical copy of Exploring Strategy text only 10th edition as well as access to the eText and MyStrategyLab. With over one million copies sold worldwide, Exploring Strategy has long been the essential introduction to strategy for the managers of today and tomorrow. From entrepreneurial start-ups to multinationals, charities to government agencies, this book raises the big questions about organisations - how they grow, how they innovate and how they change. With two new members added to the renowned author team, this tenth edition of Exploring Strategy has been comprehensively updated to help you: - Understand clearly the key concepts and tools of strategic management - Explore hot topics, including internationalisation, corporate governance, innovation and entrepreneurship - Learn from case studies on world-famous organisations such as Apple, H&M, Ryanair and Manchester United FC.

Aiming to bridge the gap between theory and application, this work focuses on strategic management.

Now in its tenth edition, Contemporary Strategy Analysis continues its tradition of accessibility, practicality, and real-world relevance to graduate and undergraduate students around the world. Focusing on strategic analysis, value creation, and implementation, this book provides a rigorous grounding in essential principles while offering up-to-date perspectives based on practices used at leading companies across industries and borders. Comprehensive coverage merges theory and application through new and updated cases, and the discussion surrounding business policy, business strategy, and the business environment links concept to context for a holistic understanding of the mechanisms at work. To keep pace with the field's constant evolution, this new edition has been revised to reflect the current business landscape with expanded coverage of critical topics including disruption, innovation, technology, and other factors impacting strategic planning and implementation. Global perspectives throughout highlight the dynamic nature of strategic management in the face of borderless business, equipping students with the well-rounded knowledge base the future of business demands.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The Nag Hammadi Scriptures, edited by Marvin Meyer, is the most complete, up-to-date, one-volume, English-language edition of the renowned library of Gnostic manuscripts discovered in Egypt in 1945, which rivaled the Dead Sea Scrolls find in significance. It includes the Gospel of Thomas, the Gospel of Mary, and the recently discovered Gospel of Judas, as well as other Gnostic gospels and sacred texts. This volume also includes introductory essays, notes, tables, glossary, index, etc. to help the reader understand the context and contemporary significance of these texts which have shed new light on early Christianity and ancient thought. The compilation of ancient manuscripts that constitute The Nag Hammadi Scriptures is a discovery that challenges everything we thought we knew about the early Christian church, ancient Judaism, and Greco-Roman religions.

Argues that a manager's central responsibility is to create and implement strategies, challenges popular motivational practices, and shares anecdotes discussing how to enable action-oriented plans for real-world results.

From the tragic young Adonis to Zašhapuna, first among goddesses, this handbook provides the most complete information available on deities from the cultures and religions of the ancient Near East, including Anatolia, Syria, Israel, Sumer, Babylonia, Assyria, and Elam. The result of nearly fifteen years of research, this handbook is more expansive and covers a wider range of sources and civilizations than any previous reference works on the topic. Arranged alphabetically, the entries range from multiple pages of information to a single line—sometimes all that we know about a given deity. Where possible, each record discusses the deity's symbolism and imagery, connecting it to the myths, rituals, and festivals described in ancient sources. Many of the entries are accompanied by illustrations that aid in understanding the iconography, and they all include references to texts in which the god or goddess is mentioned. Appropriate for both trained scholars and nonacademic readers, this book collects centuries of Near Eastern mythology into one volume. It will be an especially valuable resource for anyone interested in Assyriology, ancient religion, and the ancient Near East.

In this McKinsey Award-winning article, first published in May 1989, Gary Hamel and C.K. Prahalad explain that Western companies have wasted too much time and energy replicating the cost and quality advantages their global competitors already experience. Canon and other world-class competitors have taken a different approach to strategy: one of strategic intent. They begin with a goal that exceeds the company's present grasp and existing resources: "Beat Xerox"; "encircle Caterpillar." Then they rally the organization to close the gap by setting challenges that focus employees' efforts in the near to medium term: "Build a personal copier to sell for \$1,000", "cut product development time by 75%." Year after year, they emphasize competitive innovation—building a portfolio of competitive advantages, searching markets for "loose bricks" that rivals have left undefended, changing the terms of competitive engagement to avoid playing by the leader's rules. The result is a global leadership position and an approach to competition that has reduced larger, stronger Western rivals to playing an endless game of catch-up.

This book presents effective strategies for developing countries to leverage their public sector demand for manufactured imports to promote industrialization, trade, and technology transfer. Technology transfer and its absorption is considered one of the most crucial and complicated challenges for developing countries, which are characterized by insufficient infrastructure, low technological intensity of the domestic capital stock, and high levels of manufactured imports. Which strategies and policy tools can governments employ to link demand with technology transfer, thereby enhancing absorption capacity and development in emerging economies? This book is part of a broader project launched by PGlobal Global Advisory and Training Services Ltd., in cooperation with Istanbul Commerce University (ITUCU) and the Scientific and Technological Research Council of Turkey (TUBITAK). The contributors to this book are policymakers, academicians, and experts who are working together to identify problems and develop policy recommendations for public procurement with respect to economic development. The book includes theoretical, empirical, and case study analyses of technology transfer mechanisms, public procurement policies, and countertrade and offset strategies. The lessons learned from these chapters will be of interest to both academics and policymakers concerned with technology transfer, industrial policy, and economic development.

Rarely, if ever, do companies clearly distinguish between or balance the management of today's business and planning for the future. Derek Abell, internationally renowned for his pioneering work on strategic market planning, once again breaks sharply with conventional wisdom to demonstrate how a company can develop analytic marketing modes for not one but two distinct planning horizons. Managing with dual strategies, Abell argues, calls for new approaches not only to planning, but to organizational structure and management control. He makes specific recommendations on how current operating practices need to be adapted, and shows how leading firms are recognizing the dual nature of management as a new way of organizational life. Planning for the present, Abell shows, requires a vision of how the firm must operate now given its unique competencies and resources. By involving each level within the management team from the CEO to financial planners, to line managers, Abell details how firms can pinpoint market opportunities through careful segmentation and identification of key success factors to "connect" with customers. At the same time, he distinguishes the importance of horizontal relationships for defining and focusing on internal strategies, and vertical relationships for being attuned to changing market realities. Success today, he warns, does not ensure success tomorrow. Abell describes how world-class leaders such as Nestlé, Caterpillar, and Heineken monitor both internal and external forces for market change, successfully mastering the present, and preempting the future. Preparing for the future requires understanding the full range of activities industry-wide, and anticipating changes in technology, buyer/seller behavior, and product life cycles. Abell explains how companies can develop and implement these co-existing visions and address the real forms of change that vitally affect their future -- today and tomorrow.
