Balanced and authoritative, this volume brings together leading experts to present thirteen methodologies widely used in literacy research. Following a consistent format, each chapter describes the methodology at hand, identifies the types of questions and claims for which it is well suited, de-lineates clear standards for quality, and presents one or more exemplary

studies using the methodology. Studies are cited in each chapter and can be easily referenced and the chapters follow similar formats, making this an easy text to use. Guiding readers to choose wisely from available methodologies when designing their own research endeavors, and to understand the contributions that each mode of inquiry can generate - this is an essential text for graduate students in literacy. It is also an ideal resource for more experienced researchers seeking to build their skills for utilizing or evaluating particular approaches.

"Just as word learning is incremental, so is learning about vocabulary instruction. Teachers need exposure to research, best-practice strategies, and fellow practitioners." -Charlene Cobb and Camille Blachowicz The way we've learned influences the way we teach, but the vocabulary instruction many of us received-looking up words and writing sentences or completing worksheets- just doesn't work. So what can we do instead? No More "Look Up the List" Vocabulary Instruction is your guide to engaging, research-proven practices for teaching words effectively. Practitioner Charlene Cobb and researcher Camille Blachowicz share why old-fashioned methods don't work, what the research shows does work, and how to put the research into action. Charlene and Camille answer teachers' most commonly asked questions about vocabulary instruction, including: How many words, and how do I select them? How can I foster student independence using dictionaries and glossaries? How do I find time for meaningful vocabulary instruction? How can I assess and hold students accountable? "Without practice in the full range of ways we use a word," write Charlene and Camille, "our word knowledge is limited and falls from our grasp as the next cycle of words enters." No More "Look Up the List" Vocabulary Instruction offers a solution-deepen students' engagement with

words, increase their exposure to them, and expand their word knowledge.

Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days—or weeks—have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters—people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider—much less one who bears the telltale scars of a Beater attack—but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of

survivors learn that she and Ruthie have become the most feared, and desired, weapons in a brave new world.

CRITICAL THINKING: A USER'S MANUAL offers an innovative skill-based approach to critical thinking that provides step-by-step tools for examining arguments. Users build a complete skill set by recognizing, analyzing, diagramming, and evaluating arguments. Later chapters encourage application of the basic skills to categorical, truth-functional, analogical and inductive, and causal arguments as well as fallacies. Exercises throughout the book engage readers in active learning, integrate writing as part of the critical thinking process, and emphasize skill transference. Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.
