Written for SIT50416 Diploma of Hospitality Management, Hospitality Management, 4e covers all 13 core units plus seven electives. Each chapter is written to a unit of competency and maintains the volume of learning of previous editions, with relevant and easy-to-understand information including Australian examples and references. Structured in three parts, the text covers the knowledge and skills required of frontline supervisors, managerial topics, and business strategy content. The [Industry viewpoint](#) at the start of each chapter introduces students to current issues and themes in the hospitality industry, and numerous pedagogical features, examples and illustrations have been included throughout the text to help students engage with the material and extend their understanding. Each chapter includes activities for discussion and debate, with assessment activities requiring the understanding, application and analysis of case studies. Each section concludes with an integrated case study and weblinks to useful industry resources.

The primary goal of this text is to provide students with a solid understanding of fundamental physics concepts, and to help them apply this conceptual understanding to quantitative problem solving.

STATISTICS: LEARNING FROM DATA, Second Edition, addresses common problems faced by learners of elementary statistics with an innovative approach. The authors have paid particular attention to areas learners often struggle with -- probability, hypothesis testing, and selecting an appropriate method of analysis. Probability coverage is based on current research on how students best learn the subject. A unique chapter that provides an informal introduction to the ideas of statistical inference helps students to develop a framework for choosing an appropriate method. Supported by learning objectives, real-data examples and exercises, and technology notes, this book helps learners to develop conceptual understanding, mechanical proficiency, and the ability to put knowledge into practice. NEW for Fall 2020 - Turn your students into statistical thinkers with the Statistical Analysis and Learning Tool (SALT). SALT is an easy-to-use data analysis tool created with the intro-level student in mind. It contains dynamic graphics and allows students to manipulate data sets in order to visualize statistics and gain a deeper conceptual understanding about the meaning behind data. SALT is built by Cengage, comes integrated in Cengage WebAssign Statistics courses and available to use standalone. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Simply the best investment for anyone learning to write in French! This powerful program combines the features of a word processor with databases of language reference material, a searchable dictionary, a verb conjugating reference, and audio recordings of vocabulary, and example sentences. You will quickly learn to read, analyze, see word associations, and understand the link between language functions and linguistics structures in French.

Event Management, specifically written for the Diploma of Event Management and Advanced Diploma of Event Management, is a comprehensive resource for anyone wanting to build their expertise in professional event management. This edition adopts a scaffold learning pedagogy, helping students move through the material logically and efficiently while building on their understanding of tourism, cultural, business and sporting events.

Using an experimental perspective, this student-friendly textbook teaches chemistry as a process not a product, describing research being done in the 90s that relates to material in the book. Introduces chemistry in terms of major themes designed to help students build connections between the next series of subjects under consideration and previous chapters. Explicit attention is paid to the development of problem solving skills.

Written by two of the most distinguished finance scholars in the industry, this introductory textbook on derivatives and risk management is highly accessible in terms of the concepts as well as the mathematics. With its economics perspective, this rewritten and streamlined second edition textbook, is closely connected to real markets, and Beginning at a level that is comfortable to lower division college students, the book gradually develops the content so that its lessons can be profitably used by business majors, arts, science, and engineering graduates as well as MBAs who would work in the finance industry. Supplementary materials are available to instructors who adopt this textbook for their courses. These include:Solutions Manual with detailed solutions to nearly 500 end-of-chapter questions and problemsPowerPoint slides and a Test Bank for adoptersPRICED! In line with current teaching trends, we have woven spreadsheet applications throughout the text. Our aim is for students to achieve self-sufficiency so that they can generate all the models and graphs in this book via a spreadsheet software. Priced!
