The author analyzes the mythological structure of ancient Chinese historical traditions by engaging the problems of the legendary period. Examination of the transmission of the Mandate of Heaven and key figures in history and mythology identifies the tension between rule by virtue and hereditary succession.

A comprehensive analysis of the transformations of ancient history in early Chinese texts. This book presents a comprehensive analysis of the accounts of change of rule in Chinese texts from 600 to 100 BC, including the core philosophical works of the Chinese tradition attributed to Confucius, Mozi, Mencius, Xunzi, Hanfeizi, and Zhuangzi. Drawing from the early structuralism of Claude Lévi-

Strauss, Sarah Allan demonstrates that similar motifs repeat in every period, and argues that they serve, like myth, to mediate the inherent social conflict between kinship relations and that of the larger community. This conflict is embodied in the idea of a dynastic cycle, founded by a virtuous sage king and passed down hereditarily until a last evil ruler is again replaced, and played out at regular intervals in legends of kings and ministers, heirs and sages, ministers and recluses, regents and rebels. Each philosophical text transforms the legends in a systematic manner to reflect its own understanding of the patterns of history that inform the present. In this revised and expanded edition, Allan has added translations and original Chinese texts, as well as a new introduction further analyzing structuralism and discussing how the book remains relevant to ongoing sinological arguments. An earlier article by Allan, with supporting evidence for this book's thesis, is included as an appendix.

Many Chinese philosophic concepts derive from an ancient cosmology. This work is the first reconstructions of the mythic thought of the Shang Dynasty (ca. 1700- 1100 B.C.) which laid the foundation for later Chinese patterns of thought. Allan regards the myth, cosmology, divination, sacrificial ritual, and art of the Shang as different manifestations of a common religious system and each is examined in turn, building up a coherent and consistent picture. Although primarily concerned with the Shang, this work also describes the manner in which Shang thought was transformed in the later textual tradition.

The Vulnerability of Integrity in Early Confucian Thought is about the necessity, and even value, of vulnerability in human experience. In this book, Michael Ing brings early Chinese texts into dialogue with questions about the ways in which meaningful things are

vulnerable to powers beyond our control; and more specifically, how relationships with meaningful others might compel tragic actions. Vulnerability is often understood as an undesirable state; and as such, invulnerability is preferred over vulnerability. While recognizing the need for adopting strategies of reducing vulnerability in various situations, *The Vulnerability of Integrity* demonstrates that vulnerability is far more enduring in human experience, and that it enables values such as morality, trust, and maturity. Vulnerability also highlights the need for care (care for oneself and for others). The possibility of tragic loss stresses the difficulty of offering and receiving care; and thereby fosters compassion for others as we strive to care for each other. This book is structured to explore the plurality of Confucian thought as it relates to the vulnerability of integrity. The first two chapters describe traditional and contemporary views that argue for the invulnerability of integrity in early Confucian thought. The remaining five chapters investigate alternative views. In particular these later chapters give attention to neglected voices in the tradition, which argue that our concern for others can, and even should, lead us to compromise our integrity. In these cases we are compelled to do something transgressive for the sake of others; and in these situations our integrity is jeopardized in the transgressive act.

The book "Mozi," named after master Mo, was compiled in the course of the fifth-third centuries BCE. The seven studies included in the "The" Mozi "as an Evolving Text" analyse the Core Chapters, Dialogues, and Opening Chapters of the "Mozi" as an evolving text.

Four Warring States texts discovered during recent decades challenge longstanding understandings of Chinese intellectual history. The discovery of previously unknown philosophical texts from the Axial Age is revolutionizing our understanding of Chinese intellectual history. *Buried Ideas* presents and discusses four texts

found on brush-written slips of bamboo and their seemingly unprecedented political philosophy. Written in the regional script of Chu during the Warring States period (475–221 BCE), all of the works discuss Yao's abdication to Shun and are related to but differ significantly from the core texts of the classical period, such as the Mencius and Zhuangzi. Notably, these works evince an unusually meritocratic stance, and two even advocate abdication over hereditary succession as a political ideal. Sarah Allan includes full English translations and her own modern-character editions of the four works examined: Tang Yú zhi dao, Zigao, Rongchengshi, and Bao xun. In addition, she provides an introduction to Chu-script bamboo-slip manuscripts and the complex issues inherent in deciphering them.

Explicates early Chinese thought and explores the relationship between language and thought. This book maintains that early Chinese philosophers, whatever their philosophical school, assumed common principles informed the natural and human worlds and that one could understand the nature of man by studying the principles which govern nature. Accordingly, the natural world rather than a religious tradition provided the root metaphors of early Chinese thought. Sarah Allan examines the concrete imagery, most importantly water and plant life, which served as a model for the most fundamental concepts in Chinese philosophy including such ideas as dao, the "way", de, "virtue" or "potency", xin, the "mind/heart", xing "nature", and qi, "vital energy". Water, with its extraordinarily rich capacity for generating imagery, provided the primary model for conceptualizing general cosmic principles while plants provided a model for the continuous sequence of generation, growth, reproduction, and death and was the basis for the Chinese understanding of the nature of man in both religion and philosophy. "I find this book unique among recent efforts to identify and explain essential features of early Chinese thought because of its emphasis on imagery and metaphor". -- Christian Jochim, San Jose State

"Between 1751 and 1784, the Qianlong emperor embarked upon six southern tours, traveling from Beijing to Jiangnan and back. These tours were exercises in political theater that took the Manchu emperor through one of the Qing empire's most prosperous regions. This study elucidates the tensions and the constant negotiations characterizing the relationship between the imperial center and Jiangnan, which straddled the two key provinces of Jiangsu and Zhejiang. Politically, economically, and culturally, Jiangnan was the undisputed center of the Han Chinese world; it also remained a bastion of Ming loyalism and anti-Manchu sentiment. How did the Qing court constitute its authority and legitimate its domination over this pivotal region? What were the precise terms and historical dynamics of Qing rule over China proper during the long eighteenth century? In the course of addressing such questions, this study also explores the political culture within and through which High Qing rule was constituted and contested by a range of actors, all of whom operated within socially and historically structured contexts. The author argues that the southern tours occupied a central place in the historical formation of Qing rule during a period of momentous change affecting all strata of the eighteenth-century polity."

"Two fierce young people battle a fiery landscape and vicious foes in a race for freedom. I was glued to my seat!" —#1 New York Times bestselling author Tamora Pierce In the Alskad Empire, nearly all are born with a twin, two halves to form one whole...yet some face the world alone. The singleborn A rare few are singleborn in each generation, and therefore given the right to rule by the gods and goddesses. Bo Trousillion is one of these few, born into the royal line and destined to rule. Though he has been chosen to succeed his great-aunt, Queen Runa, as the leader of the Alskad Empire, Bo has never felt equal to the grand future before him. The diminished When one twin dies, the other usually follows, unable to

face the world without their other half. Those who survive are considered diminished, doomed to succumb to the violent grief that inevitably destroys everyone whose twin has died. Such is the fate of Vi Abernathy, whose twin sister died in infancy. Raised by the anchorites of the temple after her family cast her off, Vi has spent her whole life scheming for a way to escape and live out what's left of her life in peace. As their sixteenth birthdays approach, Bo and Vi face very different futures—one a life of luxury as the heir to the throne, the other years of backbreaking work as a temple servant. But a long-held secret and the fate of the empire are destined to bring them together in a way they never could have imagined. “With a splash of swoony romance and a thrilling conclusion, readers will be clamoring for the sequel.” —Zoraida Córdova, award-winning author of *Labyrinth Lost* and *The Vicious Deep* trilogy “Bo and Vi are fierce, complex characters, and I couldn’t devour their story fast enough!” —Amy Tintera, *New York Times* bestselling author of *Ruined* “This daring novel challenges the status quo beautifully.” —Natalie C. Parker, author of *Beware the Wild*
