Information on routine servicing and repair for the DIY mechanic, with tasks described and photographed in a step-by-step sequence.

The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid sixties Beetle, for instance, very different from one built in the mid-50s, or mid-70s, despite the obvious similarities. With the aid of hundreds of full colour photographs this new edition in paperback documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period. Uses the same format as for the highly successful VW Transporter spec guides. Aimed at early-Beetle owners and enthusiasts. Superbly illustrated with 300 colour photographs. New edition in paperback for 2018.

Models covered: Volkswagen Beetle 1285 cc (78.3 cu in). Volkswagen Beetle 1493 cc (91.1 cu in). Does not cover 1302/1303 Super Beetles, 1300A or any model with 1200 or 1600 cc engine

The VW Super Beetle was a different beast from the very simple original Beetle.

McPherson struts at the front and semi-trailing arms at the rear were more sophisticated than the older car and a bigger engine gave it more performance. Long ignored by most restorers, it is becoming more desirable as the stocks of older cars are restored or rust away. This book tells you how to restore a Super Beetle to clean, roadworthy condition with minor modifications to improve performance and handling. It describes a detailed build-up from paint and body to interior and mechanical parts. It is an invaluable guide for any Super Beetle owner or restorer.
