As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

"Every important journey should start with a map. Maps guide us and give us direction. The purpose of this introduction is to help students navigate the AP Human Geography course by understanding the expectations involved in class, thus giving students a road map and providing them direction as they start their exploration. For many students, AP Human Geography will be their first venture into a college experience and the AP environment. In addition to this challenge, AP Human Geography may also be their first full yearlong course focused solely on geography. Therefore, it is imperative for students to have an idea of what to anticipate before the year starts"--
