4. Golf Cart Solenoid. Check the golf cart solenoid for loose wires, a failed coil or a failed solenoid diode. This is a common cause for electric golf carts not starting. Battery current gets to the motor via the solenoids. You can hear the solenoids clicking on every time you press down the gas pedal.

Golf Cart Repair FAQ - Common Golf Cart Problems

If you stop hearing that clicking sound and your golf cart no longer starts up, it's likely the solenoids are to blame. The problem may be as simple as loose wires, or you may be looking at a broken coil or corrosion. If solenoids are the issue, you'll want to bring your golf cart in for repairs. 3.

What Are the Most Common Problems With Electric Golf Carts?

12-volt battery tester. Flat-bladed screwdriver. 120-volt wall socket voltage tester. Warning. Never work on an electric golf cart that is plugged in. Electric golf carts have two areas where problems usually occur, the batteries and the motor. Before you spend a lot of time and money waiting on a repairman or taking your electric golf cart to the shop, take a few seconds to troubleshoot the cart on your own.
