Nudge Nudge Think Think Experimenting

Thaler and Sunstein's book Nudge drew on work from behavioural economics to claim that citizens might be encouraged through 'light touch interventions' (i.e.nudges) to take action.This ground-breaking successor to Nudge is now available in paperback, with a new preface.In it, Peter John and his colleagues argue that an alternative approach to nudge also needs to be considered, based on what they call a 'think' strategy. Their core idea is that citizens should themselves deliberate and decide ...

Chapters 1 and 2 set out the main message of the book: policy-makers should experiment to find out the most effective way of encouraging better citizen behaviour. This chapter discusses nudge and think in some depth. Reviewing the associated literature, it explores the assumptions underlying the two strategies, and asks what nudge and think can bring to the challenge of stimulating citizen behaviour.

NUDGE THEORY It is a theory that tries to understand how people think, how they make decision, and behave. However, this involves a 'catalyst' that helps people improve their thinking and making decisions. This process is also involved in making people modify their choice of decision towards a more favorable one.
