Parkinson's Law is the old adage that work expands to fill the time allotted. Put simply, the amount of work required adjusts (usually increasing) to the time available for its completion. The term was first coined by Cyril Northcote Parkinson in a humorous essay he wrote for the Economist in 1955.

How to overcome Parkinson's Law - Work Life by Atlassian

Parkinson's Law is a principle that states that the time required to perform a task tends to extend to all the time available to perform it. Its name comes from the man who invented it: Cyril Parkinson. This Principle highlights our tendency to inefficiency when we have more time than we really need. Parkinson's Law in Time Management

Parkinson's Law explained in a simple way with Examples

Parkinson's Law is usually expressed as "Work expands so as to fill the time available for its completion.". If something must be done in a year, it'll be done in a year. If it must be done in six months, then it will. Parkinson's Law should not be used to set unreasonable deadlines. Parkinson's Law is best used as a Thought Experiment question.

Parkinson's Law - The Personal MBA

Parkinson's law is the adage that "work expands so as to fill the time which is available for its completion", which signifies that the more time we dedicate in advance to a certain task, the longer it will take to complete it, even if it could have been completed in a shorter period of time.

Parkinson's Law: Get More Done by Giving Yourself Less ...

Parkinson's Law - work expands to fill the time available for its completion - means that if you give yourself a week to complete a two hour task, then (psychologically speaking) the task will increase in complexity and become more daunting so as to fill that week. It may not even fill the extra time with more work, but just stress and tension about having to get it done.

How to Use Parkinson's Law to Your Advantage

Parkinson's law is an observation that we unnecessarily complicate things. It's not voodoo magic — giving yourself one day to write a full length dissertation will still end disastrously.

Parkinson's Law: Why Constraints Are The Best Thing You ...

But Parkinson's Law is an observation, not a form of magic. It has been observed because people tend to allow themselves to have more time than they actually need to get something accomplished. This is often because they want a buffer, but also because people have an inflated idea of how long it should take to finish a task.
