History . The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future.At its heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global partnership.

THE 17 GOALS - Sustainable Development

Food security is related to all of the United Nations Sustainable Development Goals (SDGs). Improved food security governance based on sound, equitable, and sustainable food systems that benefit from modern information and sustainable and equitable agricultural technologies is essential for countries to meet the SDGs.

Food Security and the 2015-2030 Sustainable Development ...

Security and development are two-sides of the same coin, and neither can be achieved without fully engaging women's organisations and taking into account women's concerns. As the EU moves to strengthen its ability to promote security and stability around the world, ensuring a strong gender perspective through policy-making and implementation is critical.

Security and sustainable development: including a gender ...

Goal 2 seeks sustainable solutions to end hunger in all its forms by 2030 and to achieve food security. The aim is to ensure that everyone everywhere has enough good-quality food to lead a healthy life. Achieving this Goal will require better access to food and the widespread promotion of sustainable agriculture.
