Math 5062 - Theory in Statistics II - Spring 2018

In the theory of point estimation, we considered criteria for evaluating point estimators (e.g., MSE, consistency). We can also evaluate interval estimators! For example, when we derived the 95% confidence interval for the mean of a normal distribution with known standard deviation, we started by "trapping" roughly 95% of the area below the standard normal curve between 1.96 and 1.96.
